Console text scrolling, example with 6 lines

	0	1	2	3	4	5	Home / Clear					
_	^ write cursor											
	0	1	2	3	4	5						
		•										

etc, until line 5 has has been written to

0 1 2	3 4	5
-------	-----	---

^ write cursor

then scrolling occurs: CPU re-arranges pointer list

1	2	3	4	5	0
					^ clear line, move write cursor
2	3	4	5	0	1
					^ clear line, move write cursor
3	4	5	0	1	2

^ clear line, move write cursor
